

Data Flow Diagram

Date	28 June 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being (HDI Prediction System)
Maximum Marks	2 Marks

Data Flow Diagram

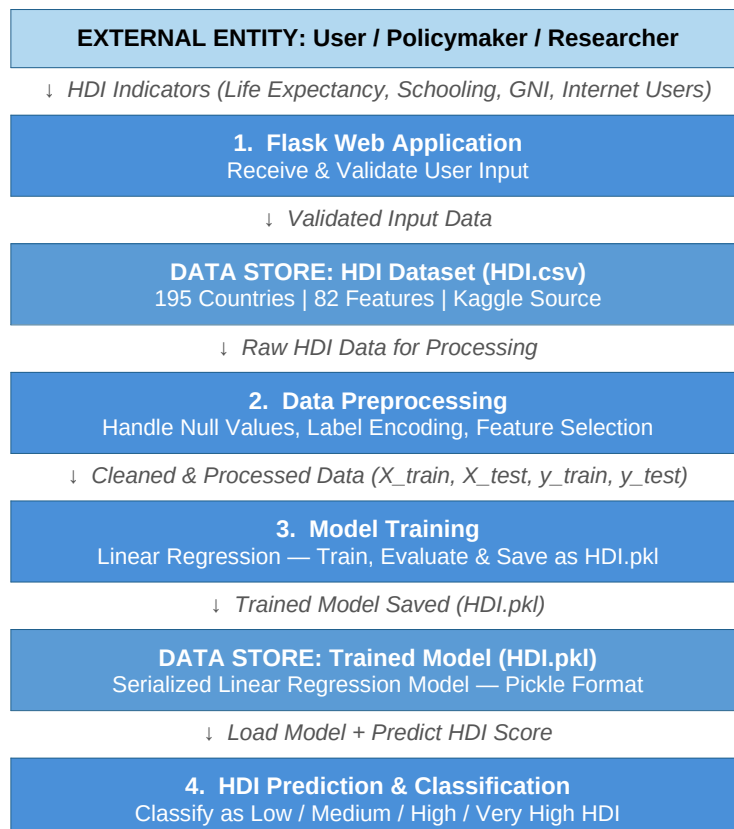

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Kaggle Dataset).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Preprocess Data, Train Model).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., HDI Dataset, Trained Model File HDI.pkl).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

HDI Prediction System — Data Flow Diagram

The diagram below illustrates how data flows through the HDI Prediction System from user input to prediction output.

↑ *Predicted HDI Score & Category (resultnew.html)*

EXTERNAL ENTITY: User Receives HDI Result
e.g. High HDI 0.76 displayed on result page
